We built a 1000 watt wind turbine to help charge the battery bank that powers our offgrid home. It's a permanent magnet alternator, generating 3 phase ac, rectified to dc, and fed to a charge controller.

Making Wind Turbine Magnet Rotors - part 2 of the Reaper wind turbine build. In this video I make the four magnet rotors for the 3 kW Reaper wind turbine, as well as a jig for...

This document provides instructions for building a DIY 1000 watt wind turbine. It includes 5 steps: 1) building magnet disks, 2) building coil disks, 3) constructing a bearing assembly, 4) making the ...

Permanent Magnet Generator Wind Turbine: I'm still making this project, so i'll be updating this as I proceed. Feel free to think along! The pictures above started it all. A rainy sunday and some scrap ...

Learn how to build a 1000 watt wind turbine completely from scratch! Axial flux off grid wind turbines are among the most efficient micro turbines currently available.

In this video I build an axial flux wind turbine with a 12 ft (3.7 m) diameter rotor driving two 12 coil/16 pole axial flux permanent magnet generators that produce up to 3 kW in a ~30 mph wind ...

Table of Contents: This video provides instructions on how to build a simple wind turbine using magnets and materials from a DIY store. Axial flux off-grid wind turbines are among the most ...

Those who live off-grid, on a boat or in a remote cabin can rely on electrical energy generated by the wind when they build one of these 21 DIY wind turbines that we have made up a ...
