Under the scheme, people who install solar or wind energy generation systems at their premises can sell the RE they generate to the power companies at a rate higher than the normal electricity tariff rate.

Under this trial scheme, each Sewage Treatment Works can treat up to 50 tonnes of food waste per day and generate about 950 000 kilowatt-hours (kWh) of energy annually.

Under the post-2018 Scheme of Control Agreements (SCAs) with the two power companies, Feed-in Tariff (FiT) and Renewable Energy (RE) Certificates are two important new initiatives to promote the ...

The Government announced today (April 26) new Feed-in Tariff (FiT) rates and introduced measures to facilitate the installation of solar photovoltaic (PV) systems in open car parks ...

Pricing and subsidy strategies for community solar development are recommended. Community shared solar (CSS) projects have emerged as a promising solution to harness the ...

With the acceleration of subsidy distribution, operators' funding for investing in new energy generation projects has been significantly increased, which will effectively enhance the investment ...

Under the Feed-in Tariff Scheme (the Scheme), which was introduced by the Government in collaboration with the two power companies in 2018, people who install solar energy ...

Solar energy generation systems for installation on rooftop, land and other locations can be considered. The applicant is responsible for the procurement, installation and maintenance of the solar energy ...
