What is an IP55 rating?

One of the most widely used protection levels is IP55. In this article, we explain what an IP55 rating is, how protection against dust and water is achieved, and which design features allow an IP55 enclosure to withstand outdoor and industrial environments.

What is the IP rating on a cabinet?

The IP rating on enclosures is an international protection standard that indicates how well the cabinet is protected against two factors: the ingress of dust or solid particles, and the ingress of water. The IP55 marking includes two digits that determine the nature and intensity of the enclosure's protection against external influences.

What is an IP55 outdoor cabinet?

The second "5" indicates that the body can withstand the effects of water jets coming from any direction. This means that an IP55 outdoor cabinet can operate safely during rain, splashes, or routine external washing, making it suitable for most outdoor telecom and electrical installations.

Are IP55 and IP65 rated enclosures suitable for external use?

A: Yes, both enclosures rated IP55 and IP65 are suitable for external use. These enclosures are protected against ingress of dust and water jets, making them suitable for a wide range of indoor and outdoor uses. However, harsher outdoor environments may be suited to IP65 rated enclosures as it offers higher protection.
