Fire Risks of Energy Storage Containers Lithium batteries (e.g., LiFePO<sub>4</sub>, NMC) may experience thermal runaway under conditions such as overcharging, short-circuiting, mechanical damage, or ...

Shaped by the movement of the water, the surrounding park is designed by BIG Landscape and manages storm surges through sloping terraces, vegetated dunes, and wetland gardens that slow ...

The 500kW / 1000kWh Containerized Energy Storage System is a high-performance, rugged power solution for industrial and utility applications.

Like a little sister to the Suzhou Museum of Contemporary Art, the Jinji Lake Pavilion seeks to reimagine the future architecture and landscape of the Lake District rooted in the rich heritage of Suzhou's ...

The Energy Storage Fire Nozzle is a specialized firefighting nozzle designed for the energy storage industry. It is primarily used in large-scale and distributed energy storage power stations, mobile ...

However, the risk of thermal runaway in lithium batteries makes fire protection systems a critical safeguard for energy storage safety. This white paper delves into the design principles, key ...

BIG has grown globally since 2005, with 60+ buildings in 10+ countries. Join our 700+ person team shaping the future of architecture and design challenges.

Designed by BIG Landscape, the courtyard's design is repeated in the office's surrounding landscape, where green pockets for socializing are placed close to the entry area.
