An ecosystem that allowed Swiss homeowners to import panels from Germany and have someone in Switzerland fit them would be a huge help. Currently, they are typically offered in ...

They convert solar radiation into electricity in the form of direct current, which is then converted into alternating current with the aid of an inverter so that it can be used directly on site (own consumption) ...

The company specializes in photovoltaic technology, offering a variety of solar panels designed for high performance and longevity. They ensure efficient installation and comprehensive support throughout ...

On-grid installations accounted for 9.61 GW of the Swiss solar energy market size forecast for 2025 and are expected to maintain a 13.38% CAGR through 2031, driven by universal ...

We are continuously improving the power, performance and reliability of our modules to achieve their technological advantage in the market and become the world's leading supplier of innovative solar ...

OverviewSolar productionOppositionFeed-in tariffs 2009 (KEV)Energy Act 2017Solar power in Switzerland has demonstrated consistent capacity growth since the early 2010s, influenced by government subsidy mechanisms such as the implementation of the feed-in tariff in 2009 and the enactment of the revised Energy Act in 2018. As of 2024, solar power contributes 5.89 TWh of generation to the Swiss grid with the share of share of solar power in electricity generation has also increased, cli...

Solar panel installations are only profitable in half of Swiss cities according to a new study. This could create hurdles for the expansion of solar energy in the country.

Solar power covers 11% of the electricity demand in Switzerland. The industry's turnover for the current year is around CHF3.7 billion (\$4.2 billion), reveals the first Swiss Solar Monitor.
