What is the wind energy industry?

The wind energy sector in the US is a dynamic and rapidly evolving industry focused on harnessing wind power for clean electricity generation. Comprising manufacturers, developers, and service providers, these companies work tirelessly to construct and maintain wind farms, design innovative turbine technologies, and provide energy solutions.

How many GW of solar & wind installations are there in China?

GEM has tracked at least 891 GW of operating utility-scale solar and wind capacity in China. China officially installed 277 GW of utility and distributed solar and 80 GW of wind in 2024, and GEM has tracked 136 GW of those utility-scale solar and wind installations to the asset level.

Is Siemens Energy a wind power company?

Siemens Energy is a wind leader, installing more than 100 GW of renewable energy capacity since 1998. "The road ahead for the entire wind industry is long," says Vinod Philip, Member of the Executive Board of Siemens Energy and Executive Vice President Wind Power.

How much energy is generated by wind & solar?

For the first time, wind and utility-scale solar generation exceeded coal output, accounting for nearly 16% of U.S. electricity generation, marking a significant shift in the energy mix. Total generation in the interconnection queue at the end of 2023 was 2,367 GW, with over 95% represented by wind, solar, and storage.

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find more about Ember's methodology in this ...

The top wind power companies supporting and developing renewable energy projects globally include Siemens, NextEra Energy, GE Vernova and Enel

In 2024, global renewable installation reached new records, with over 450 GW of new solar capacity and over 110 GW of new wind capacity. China accounted for over 60% of these renewable installations, ...

Discover the top 17 green energy companies leading the market in 2025, with a combined market cap of \$844.12 billion and innovative technologies driving the renewable revolution.
