Energy Storage Canada is the only national voice for energy storage in Canada today. We focus exclusively on energy storage and speak for the entire industry because we represent the full value ...

Canada's total wind, solar and storage installed capacity is now more than 24 GW, including over 18 GW of wind, more than 4 GW of utility-scale solar, 1+ GW on-site solar, and 330 MW of energy storage.

Bluesphere Ventures is set to develop dozens of five-megawatt (MW) energy-storage projects across Toronto and 200 MW altogether in Canada.

There are three main types of energy storage currently commercially available in Canada: Storage is playing an increasingly important role in the electricity system by improving grid reliability ...

The East of GTA Energy Storage Project is a large-scale battery energy storage project located east of the greater Toronto area and is planned to be 325 MW in size. The project is located on 50+ acres of ...

Energy storage technologies, such as batteries, can be paired with solar to provide emergency backup power during power outages, reduce electricity bills and benefit the grid.

The IESO is offering contracts to seven battery storage facilities located throughout the province, varying in size from 5 MW to 300 MW. These facilities will serve to meet both province ...

The IESO expects Ontario will have at least 1217 MW of energy storage capacity active in the market by 2026. The seven projects announced as part of the initial 739 MW are in different ...
