You can make a one-time or monthly donation to Many Mansions. Your donation can be made in honor of or in memory of someone and an acknowledgment can be sent in recognition of your gift.

We use many to refer to a large number of something countable. We most commonly use it in questions and in negative sentences: ...

There are three primary types of towers for large wind turbines: tubular steel, lattice, and hybrid towers, with the tubular steel design being the most prevalent in modern installations.

Many Mansions is a non-profit organization that provides well-managed, service-enriched, affordable housing to low-income residents.

You use many to indicate that you are talking about a large number of people or things. I don't think many people would argue with that. Not many films are made in Finland. Do you keep many books ...

Figure 1 Each of the four major wind turbine sections--tower, hub, blades, and nacelle--must withstand tremendous temperature and wind conditions. During operation, blades tip ...

The nacelle of a standard 2MW onshore wind turbine assembly weighs approximately 72 tons. Housed inside the nacelle are five major components (see diagram): a. Gearbox assembly b. ...

The modern wind turbine typically consists of three main sections for its tower, which is assembled on-site. The height of the tower generally matches the diameter of the rotor's circular ...
