What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) is a type of backup battery that will continue to provide electrical power to the electronics that you have plugged into it even if electricity from your home outlets cuts out. Unlike a backup generator, it does not need to power up in order to start generating power.

Should you invest in an uninterruptible power supply (UPS)?

When considering the investment in an uninterruptible power supply (UPS), it's crucial to evaluate UPS price points meticulously. The market offers a range of UPS solutions catering to diverse business needs and budgets.

Does uninterruptible power supply USP provide surge protection?

Many models of uninterruptible power supply USP also provide surge protection. A surge protector blocks spikes in voltage so that they do not harm your electronics. So, your battery backup is always at work, protecting your desktop computer, network equipment, or other electronic equipment and charging its battery when not in use.

In general, the size of the battery backup will determine how much power it can provide to your devices and for how long. Remember, in order to switch to longer-lasting emergency power, you will also ...
