How much does an EV battery replacement cost?

Electric car battery replacement costs outside of warranty typically range from \$5,000 to \$16,000, depending on the pack size and manufacturer, but these out-of-pocket repairs are extremely rare.

How much does a long range battery replacement cost?

More recently, a Reddit reader added that a Long Range battery replacement (75 kWh) cost them around \$13,000 - including labor - in 2023. Another reader gave a similar quote. That still works out to \$173/kWh. However, third party retailers, such as Greentec Auto, offer refurbished OEM packs for \$9,000, which works out to \$120/kWh.

How much does it cost to replace a battery pack?

Another third party that refurbishes and replaced packs is re/cell, which offers 250 kWh packs at \$6995 and 340 kWh for \$7495 - \$8999. They offer an add-on extended warranty on their battery packs with coverage for 2 years or 24,000 miles. See the full breakdown of Model 3 replacement costs.

How much do EV batteries cost in 2024?

Since the original mass market EVs in 2012, battery prices have fallen from over \$400/kWh to \$111/kWh by the end of 2024. That's a massive drop over just 12 years. As battery prices continue to decline, the price you would pay today is different than the price you would pay next year or in 5 years.
