How is solar sales commission calculated?

Salespeople who generate many leads or who sell a high volume of solar products may also be eligible for additional bonuses. Therefore, there is no set formula for how solar sales commission is calculated, as it can vary depending on several factors. [How To Sell Solar Panels?](#)

What factors affect a solar salesman's Commission?

The size of the sale is also a factor that affects a solar salesman's commission. For example, if a solar salesman sells a \$10,000 solar system, their commission will be higher than if they sell a \$5,000 solar system. Additionally, some companies offer bonuses or commissions for meeting or exceeding sales targets.

How much does photovoltaic energy cost?

The photovoltaic energy cost price is estimated at about 5 cents per kWh over the lifetime of the plant, compared to an average energy cost of between 11 and 17 cents per kWh today for a business, depending on its level of annual consumption from its supplier.
