How to install solar panels?

The first step in solar panel installation is fixing the mounting structure to support the panels. The whole mounting structure must be tilted and have an angle between 15 to 20 degrees to have maximum sunlight exposure. For countries in the Northern Hemisphere, the best direction to face solar panels is south because it gets maximum sunlight.

How do I choose a solar panel system?

Before installation, a thorough site assessment is essential to determine the feasibility and optimal design of your solar panel system. This process involves evaluating your property's solar potential, roof condition, and energy needs.

How do you install solar panels on a flat roof?

For Flat Roofs - Installers use either ballasts or concrete blocks to rack the solar panels. Once you secure the structures into place properly, you can move on to installing the racking rails. When installation day begins, start with ensuring the solar racking system conforms to your design and drawing. 2. Mounting the Solar Panels
