Ultra-fast charging is a common and ever-increasing need for passenger cars and commercial vehicles around the world. Our liquid-cooled power units greatly surpass existing ...

Huawei liquid-cooled ultra fast charger solution delivers high-power EV charging with efficient thermal management, reliable performance, and scalable deployment.

Huawei claims this represents a nearly fourfold improvement in replenishment efficiency compared to traditional fast-charging stations. A key technological innovation is the charger's ...

Based on the ultra-fast integrated charging architecture, Huawei's all-liquid-cooled supercharging infrastructure can support long-term smooth evolution in the future, and at the same ...

New Huawei Supercharger for EVs has the highest power of 1.5 megawatt and can reload 20kWh of electricity per minute. It is the industry's first completely liquid-cooled charging ...

The emergence of Huawei's 600kW Liquid-Cooled Ultra-Fast Charging pile is bound to accelerate the technology development and wide application of high-power liquid-cooled charging ...

Yesterday, Huawei released the charging network solution of "New Generation Full Liquid-cooled Supercharge Architecture" at the new smart electric product launch conference.

Huawei has launched its first-ever liquid-cooled 600kW supercharging station. The ultimate solution is jointly developed by Enerji SA, Zebra, and Huawei Digital Energy.
