Does Spain have a problem with Huawei?

Spain is experiencing a paradoxical situation with regard to Chinese tech company Huawei, highlighting tensions between national security, commercial interests and geopolitical pressures. While the Chinese giant has been expelled from the country's 5G network, it remains authorised for wiretapping.

What does the new EU Regulation mean for energy storage?

The new regulation aligns with European Union Regulation 2019/943 by formally recognizing storage as a flexibility technology that enhances renewable energy integration and system stability.

Should Huawei be excluded from the EU?

Pedro Sánchez has been, within the EU, one of the most favourable leaders to Huawei's presence, publicly defending that the company should not be excluded because of its country of origin. This position contrasts with the pressure that Brussels has been exerting on Spain over the last two years, without any visible effect.

What is Spain's position on Huawei and ZTE?

The Spanish position contrasts sharply with the European and Western trend. The European Union has intensified pressure on Spain to tighten its regulations against Chinese suppliers following the pact reached by Germany to progressively dismantle Huawei and ZTE's infrastructures.

The Spanish Battery Energy Storage Association (AEPIBAL) says the new regulation represents a major step forward, unlocking several long-standing bottlenecks that have hindered ...

Per the updated regulation, all renewable energy power stations (regardless of energy storage configuration) will receive priority protection during grid congestion, becoming the last to be ...

Renewable energy project developer Margenerji is partnering with OEM Huawei to deploy a 2MW battery energy storage system (BESS) at a solar plant in Turkey.

Spain is experiencing a paradoxical situation with regard to Chinese tech company Huawei, highlighting tensions between national security, commercial interests and geopolitical ...

China's first large-capacity supercapacitor hybrid energy storage Xuji provided 8 sets of 2.5MW energy storage and frequency regulation PCS integrated booster systems and 6 sets of high-rate lithium ...
