With targeted subsidies for renewable electricity and storage technologies, we are providing impetus that will advance both the economy and the energy transition.

“The average Vienna household could save EUR600/year by pairing solar panels with a 10kWh battery system,” reports the Austrian Energy Agency's 2023 study.

As Vienna accelerates its renewable energy transition, energy storage projects have become critical infrastructure. This article explores the latest bidding strategies, technical requirements, and market ...

He indicated that the airport is ready to invest in storage technology but stressed that regulatory improvements by E-Control are necessary to facilitate this investment.

Moreover, the maximum subsidy for electrical storage systems has been raised from EUR25,000 to EUR50,000, reflecting a commitment to bolstering the infrastructure necessary for sustainable energy ...

On Schafflerhofstraße in Vienna's 22nd district, on the site of a former municipal gravel depot, the energy provider is building a solar array that is equivalent in size to 15 football pitches.

A large battery storage with five megawatts stores the solar power from Vienna's largest photovoltaic system on Schafflerhofstraße and feeds it into the grid.
