Can I add more solar panels if my roof is old?

Do not add more solar panels to your system if your roof is old, it is a leased system, or if you do not have enough roof space for extra panels. Contact your original solar installer to add more panels to your system.

Why add solar panels to an existing solar system?

Should I add solar panels to my existing system?

If you add solar panels to an existing system, you can increase your solar electricity generation, extend the life of your installation, and create further savings on utility energy costs.

Can I add more solar panels to my home?

Most of the time, you can add more solar panels to your home. The economics will probably look a lot different then the first time you went solar. (And if you live in a state like California that upended its solar incentives, you're probably better off leaving your old setup alone.)

Should you replace old solar panels?

Replacing your old solar panels with new solar panels. Today's solar panels generate about 25% more electricity from the same roof space as equipment from just 5 years ago, and even more compared to decade-old panels. Sometimes, replacing your old equipment can yield the biggest payoffs. How can replacing old solar make any sense?

Does it ever make sense to add new panels to an old system that's grandfathered into a better metering plan?

"Adding extra solar might still be worth it, sometimes," says Matt Schuler, a ...

Why add solar panels to an existing solar system? When you first get solar panels, the system is designed to install the right amount of solar panels to offset your historic electricity usage. If you start ...
