The BAICells MBS31001C Nova436Q Base Station Power Supply with GPS Antenna is a crucial component of a Baicells Nova4G LTE network. This power supply and GPS antenna combination ...

In the RTCM box it shows that the base status indicator is green and both the GPS and Glonass satellite systems are green (if you want to change the satellite system, refer to the following section). The box ...

With one exception, it allows one to setup an RTK Fixed Baseline station and have it update the vehicle's GPS with RTCM corrections without having to use a PC running Mission ...

Do not set up the base station directly beneath or close to overhead power lines or electrical generation facilities. The electromagnetic fields associated with these utilities can interfere with GNSS receiver ...

This guide will assume that the following setup steps have already been completed: Required Equipment
Sentera Ground Radio Antenna Coax Cable* USB to USB-C cable** USB to USB ...

Use of a T-Bar setup ensures that the base station is set up with exactly the same position and height every day. This helps eliminate the errors typically associated with daily tripod setup. For example, ...

I got the system working by purchasing an additional GPS receiver which connects to my computer through USB. I had hoped that I could use one GPS receiver for both the RTK injection ...

Please place the base station in an outdoor environment with sufficient sky coverage to obtain a good satellite signal. Place the base station on a stable and elevated platform, such as a tripod.
