-----

Polycrystalline 72-cell module achieves a power output up to 340Wp. Eagle modules pass PID test, limited power degradation by PID test is guaranteed for mass production. Advanced glass and ...

Mixing panel generations within a single string can create electrical mismatches that reduce overall system performance. When expanding a legacy Eagle G2 array, sourcing identical ...

Better light trapping and current collection to improve module power output and reliability. Minimizes the chance of degradation caused by PID phenomena through optimization of cell production technology ...

Modules with different electrical parameters must not be connected in series. String voltage must not be higher than the maximum permitted system voltage, as well as inverter's maximum input voltage and ...

These high quality, industry-leading products are backed by strong warranties and a solid on-time delivery track record. The EAGLE® G7 modules utilize our latest flagship TOPCon cell technology, ...

Featuring High-voltage 1500V capability with UL & IEC certification, you can run longer strings with lower balance of system costs and better LCOE. Jinko Eagle 72HM G2 solar panels include a 10-year ...

The JKM400M-72HL-V is a high-efficiency 400-watt monocrystalline solar panel manufactured by Jinko Solar, part of their Eagle 72HM G2 series. This panel represents Jinko Solar's ...

General Information 1.1 Overview Thanks for choosing Jinko Solar PV modules. In order to ensure the PV modules to be installed correctly, please read the following operation instructions carefully before ...
