The preparation of this Road Map was led by the Energy Division of the United Nations Economic Social Commission for Asia and the Pacific (ESCAP) in collaboration with the Ministry of Infrastructure and ...

Kiribati's dependence on imported oil to meet the majority of its energy needs creates vulnerability to oil price volatility and results in high energy costs, which place a burden on local development.

That's Kiribati's reality - until now. The Kiribati Energy Storage Project is flipping the script, combining solar arrays with massive battery banks to create a hybrid power system.

The South Tarawa Renewable Energy Project (STREP-the project), ADB's first in Kiribati's energy sector, will finance climate-resilient solar photovoltaic generation, a battery energy storage system, ...

Increasing the adoption of minimum energy performance standards and labelling (MEPSL) for lighting, refrigeration and air-conditioning as well as introducing electric vehicles for government ...

The KIER is Kiribati's comprehensive energy roadmap, which takes into account renewable energy and energy efficiency potential in all sectors from 2017 to 2025.

That's Kiribati's reality - 33 coral atolls facing energy poverty and climate threats simultaneously. With 70% of urban households experiencing daily blackouts during peak hours, the urgency isn't ...

Looking to address challenges at the local level, the roadmap recommends solar desalination in South Tarawa; a combination of wind power, PV and battery storage for Kiritimati Island; and renewable ...
