The project is set to integrate a lithium-ion energy storage system, leveraging the existing interconnection to maximize efficiency, economic value and renewable energy utilization.

Land Office (GLO) recently awarded a first of its kind carbon sequestration project that will allow for offshore storage of carbon dioxide (CO₂) in submerged lands near Jefferson County, near Port ...

It was billed as Europe's largest battery storage project when it became operational at the end of 2014 and was revolutionary thanks to its technology providing a range of benefits to the wider ...

NLR has unique capabilities to conduct megawatt-scale research on hydrogen generation, energy storage, power production, and distribution. Researchers focus on hydrogen ...

The government announced the winners of LTESA Round 6 for long-duration energy storage today (5/2/2026). The round secured 1,171 MW / 11,980 MWh of long-duration battery ...

On the cradle of Western civilization, a new chapter of energy transformation is quietly unfolding. Recently, Sermatec successfully completed the commissioning of its commercial and ...

Accelerated by DOE initiatives, multiple tax credits under the Bipartisan Infrastructure Law and Inflation Reduction Act, and decarbonization goals across the public and private sectors, energy storage will ...

NLR's multidisciplinary research, development, demonstration, and deployment drives technological innovation and commercialization of integrated energy conversion and storage solutions.
