Lower O& M cost High temperature restriction and micro-crack resistance, front grid free, ensuring roof safety, reducing module failure rate.

The breakthrough double-glass module, with a designated area just over 1.6 m², weighs under 25 kg and is an ideal size for residential applications. The efficiency was independently ...

The double-glass module, with a designated area of merely over 1.6 square meters and weighing under 25 kilograms, is an ideal size for residential applications. Moreover, the breakthrough ...

Assembled with multi-busbar PERC cells, the half-cell configuration of the modules offers the advantages of higher power output, better temperature-dependent performance, reduced shading ...

Covered by a low-iron content, high-transmission PV solar front glass, each of the 60 monocrystalline cells measures 156 mm X 156 mm. Produced in our North American factories, the HELIENE 72 M is ...

PERC, half-cut, multi-busbar, and large cell designs enables our PV modules to pack more power per module, capture more conditions. Whether you are EPC, installer, contractor, or ...

The 60-cell double-glass module, with a designated area of just over 1.6 square metres, weighs under 25 kilograms and is "an ideal size for residential applications", according to Oxford...

Covered by a low-iron content, high-transmission PV solar front ...
