How will US tariffs affect Chinese lithium batteries in 2025?

U.S. tariffs on Chinese lithium batteries have become a critical factor shaping the global battery market in 2025. These tariffs directly impact lithium-ion batteries' cost, supply chain, and competitiveness, essential for electric vehicles (EVs), renewable energy storage, and consumer electronics.

Will a tariff increase on Chinese lithium-iron-phosphate battery imports disrupt Bess?

Proposed tariff increases on Chinese lithium-iron-phosphate (LFP) battery imports threaten to disrupt the United States' deployment of battery energy storage systems (BESS), a critical enabler of grid stability and the renewable energy transition.

Will China impose tariffs on lithium-ion EV batteries?

An interesting issue will be the imposition of tariffs. There are existing tariffs pursuant to Section 301 of the Trade Act of 1974 on some Chinese-origin lithium-ion EV batteries and non-lithium-ion battery parts, which were increased to 25% in September 2024.

What is the US tariff policy on lithium ion batteries?

In April 2025, the U.S. government updated its tariff policy on lithium-ion batteries imported from China. The current tariff structure includes: A 3.4% global tariff on lithium-ion batteries, regardless of origin. A Section 301 tariff targeting Chinese imports, currently at 7.5%, is scheduled to rise to 25% by January 2026.

Discover how the U.S. Executive Order of July 31, 2025, adjusting reciprocal tariffs effective August 7, affects lithium-ion and polymer battery raw material costs, and explore practical supply-chain ...

Tariffs on Chinese-origin lithium-ion non-EV batteries are scheduled to increase to 25% effective January 1, 2026. Otherwise, batteries of non-Chinese origin storage batteries have not been ...

This article comprehensively analyses U.S. tariffs on Chinese lithium batteries, exploring the latest tariff rates, their economic effects, and future implications for industries and consumers.

For energy storage, Chinese lithium-ion batteries for non-EV applications from 7.5% to 25%, more than tripling the tariff rate. This increase goes into effect in 2026.

Learn how One Union Solutions helps importers manage tariffs, HS codes, and DDP/DAP shipping for Chinese lithium-ion batteries in the U.S. market.

Lithium battery energy storage container export tariff

Source: <https://esafet.co.za/Sat-02-Dec-2023-27821.html>

Explore how 2025 battery tariffs affect U.S. imports, energy storage, EV production, and sourcing strategies amid rising China tariffs and trade shifts.

Proposed tariff increases on Chinese lithium-iron-phosphate (LFP) battery imports threaten to disrupt the United States' deployment of battery energy storage systems (BESS), a ...

This briefing focuses on the tariffs affecting battery energy storage. Policy changes affecting the solar portion of the Section 301 tariffs are addressed in a separate briefing.
