-----

The 12000W low-speed permanent magnet generator offers a gearless design, enabling direct-drive operation with wind turbines. Built on NdFeB rare earth magnets and high ...

Harness the power of the wind with our 150 RPM Wind Turbine Alternator, designed for optimal energy conversion even at low wind speeds. Engineered with advanced permanent magnet technology, this ...

Direct-drive wind permanent magnet generators offer high efficiency. PM generator with PMA or PMG design ideal for wind turbines with low RPM, no gearbox.

1kW wind turbine alternator (255-EZWG-006) at 330 RPM with permanent magnet generator design. Reliable PMA or PMG for efficient low-speed wind energy output.

Wind Turbine Alternators Innotec serves as a partner for OEM wind turbine manufacturers, developers and operators. Our direct drive permanent magnet alternators exceeds an efficiency of 90%. The low ...

Low RPM permanent magnet generators and products allow you to increase efficiency and streamline your processes. Small wind turbines are one of ...

Wind turbines often rotate slowly, especially in areas with low wind speeds. Low RPM generators can directly generate electricity from these turbines without needing gearboxes, which improves efficiency.

Low RPM permanent magnet generators are ideal for efficient energy generation in wind and water turbine applications due to their high ...
