President Lazarus Chakwera has today officially launched the Battery Energy Storage System (BESS) project by the Electricity Supply Corporation of Malawi (Escom) at Kanengo in Lilongwe.

Malawi is building its first battery-energy storage system to protect its grid from extreme weather, including cyclones that have repeatedly disrupted power in recent years.

In this context, this Malawi Sustainable Energy Investment Study, a partnership between DoEA, the UN-OHRLLS and Rocky Mountain Institute, is timely and essential. This document outlines a clear vision ...

Malawi was bringing more solar power onto the grid but instability, with frequent nationwide outages disrupted homes, businesses, and essential services. To fix this, Malawi turned ...

The Malawi BESS project aligns with the COP29 Presidency's Global Energy Storage and Grids Pledge, targeting a sixfold increase in energy storage to 1500GW and significant grid ...

Malawi is building its first battery-energy system, a technology that will help protect its grid from cyclones that have battered the southern African nation in recent years.

Backed by our Alliance, and implemented by the state utility ESCOM, the project will install a 20MW/30MWh battery system in Lilongwe. The system will store electricity when supply is high and ...

From stabilizing hospitals' power supply to enabling all-night study sessions for students, this project proves energy storage isn't just technical jargon - it's the foundation for Malawi's brighter tomorrow.
