Mexico is seeing a surge of large-scale solar and battery storage proposals across multiple states following an October decree that sets clearer rules for private energy investments.

By investing in renewable energy, integrating energy storage, and enhancing domestic manufacturing, Mexico is paving the way for a resilient and innovative energy landscape that meets ...

In October, Spanish energy company Iberdrola announced plans to move ahead with two solar projects totaling 535 MW in Mexico, marking a renewed commitment to the country's energy ...

Private companies will invest US \$4.75 billion to build 20 renewable energy projects across 11 Mexican states, Energy Minister Luz Elena Gonz#225;lez announced Wednesday.

Thanks to the country's geographical conditions, Mexico has great potential for solar and wind energy, which makes it an ideal candidate for the implementation of energy storage systems to ...

Solutions that combine generation with flexibility -- through storage and intelligent control -- are becoming essential for companies seeking operational certainty in an increasingly constrained grid ...

Phase III of the project will add 300 MW of solar PV capacity and 90 MW of battery energy storage with a three-hour duration, with an estimated investment of MXN 6.49 billion. ...

Future wind and solar energy projects in Mexico will be required to colocate battery energy storage systems equivalent to 30% of their capacity, a senior government official told the ...
