Maximize energy resiliency, efficiency, and security with the industry's leading microgrid control solutions. SEL is the global leader in microgrid control systems, verified by rigorous independent ...

NLR develops and evaluates microgrid controls at multiple time scales. Our researchers evaluate in-house-developed controls and partner-developed microgrid components using software ...

A microgrid control system, also known as a microgrid automation system, is a comprehensive solution for managing distributed energy resources (DERs), load centers, and grid connectivity to ensure ...

Connect to and balance the energy flows between various energy assets and the site load. Run controller-based algorithms or store and execute server-based schedules. Provide easy on-site ...

The heart of the microgrid/Battery Energy Storage System (BESS) power management or control solution is the microgrid/BESS controller, which is based on AC800M process automation controller ...

NLR develops and evaluates microgrid controls at multiple time scales. Our researchers evaluate in-house-developed controls and ...

ETAP Microgrid Control offers an integrated model-driven solution to design, simulate, optimize, test, and control microgrids with inherent capability to fine-tune the logic for maximum system resiliency ...

Generac Link Microgrid Controllers are purpose-built to orchestrate multiple energy assets--solar, storage, generators, and more--into a unified, efficient power system.
