Microgrid Initiatives was established as Microgrid Institute 2013 to chart pathways toward a more sustainable and resilient future with advanced microgrids and distributed energy resources.

Through this intervention, the city of Podgorica will validate the effectiveness of green roofs, green fa&#231;ades and unsealed surfaces as a climate change adaptation and mitigation strategy, aiming at ...

Following the signing of a Memorandum of Understanding between the Capital City and the United Nations Development Programme (UNDP) at the end of February, a working meeting was ...

Statistics by the International Energy Agency predicts that there'll be a tremendous increase in the development of microgrids; by 2040, about 80 million people will have access to electricity through ...

A microgrid, regarded as one of the cornerstones of the future smart grid, uses distributed generations and information technology to create a widely distributed automated energy delivery network.

The city of Podgorica aims to improve the overall living conditions of its inhabitants and to promote smart and sustainable urban development with a vision of becoming a smart and sustainable city.

Introduces a novel two-stage robust optimization framework for scheduling carbon-free microgrids with decision-dependent uncertainties (DDUs). Proposes dynamically adaptive polyhedral.

In this paper, a review of recent developments in rural electrification through micro-grids is presented. This work first lays the background on the challenges hindering the mass deployment of ...
