Monaco customers save money on running costs thanks to an innovative feature that allows the battery management system to charge during off-peak hours and distribute ...

Romanian transmission system operator Transelectrica has announced a tender for a battery energy storage project with a 35MW power output and 70 MWh storage capacity. [pdf]

To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an innovative ...

On July 20th, the innovative demonstration project of the combined compressed air and lithium-ion battery shared energy storage power station commenced in Maying Town, Tongwei County, Dingxi ...

Battery storage is increasingly seen as a cornerstone of the energy transition, offering grid stability and flexibility as renewables surge. The new facility features 48 battery containers and 240 inverters, ...

Energy storage is widely considered essential for maximising the potential of renewable sources such as solar and wind, allowing excess production to be stored and redistributed when ...

Explore use cases that improve energy efficiency, carbon footprint and ROI. Discover how Monaco can serve as a trusted European base for clean energy projects. Connect directly with ...

Topics will include how battery energy storage systems and digital platforms support grid stability, use cases for improving energy efficiency and return on investment, and how Monaco could ...
