In partnership with EV infrastructure company Thundergrid, the airport will use solar energy stored in a Battery Energy Storage System (BESS) to power its terminal day and night.

Refrigerated commercial cabinets (incorporating both display and storage cabinets) are widely used within the food sector and are commonly used for 24 hours per day, seven days a week - resulting in ...

Our new Battery Energy Storage System (BESS) will allow us to store solar energy captured during daylight hours and use it during evening operations. The state-of-the-art Linyang battery units form ...

New Zealand has bold aspirations for a low-carbon future. Tomorrow's terminals will lead by example, designed with circular thinking and built for net-zero operations.

GLASHAUS POWER - Industrial energy storage cabinets have become critical infrastructure for factories, commercial facilities, and renewable energy projects across Auckland.

Designed to support grid-tied and off-grid scenarios, the Hybrid ESS cabinet offers seamless integration and maximized space utilization, making it an ideal choice for growing energy demands.

Zealand's energy security over the short, medium, and long term. This white paper presents the key findings of that analysis, including considering a long list of solutions for flex.

Kowhai Park, a large-scale solar farm initiative at Christchurch Airport, is setting the stage for sustainable aviation in New Zealand by supplying renewable electricity at scale for zero/low-emission ...
