What are the different types of lithium battery packs?

Sample of Custom Nimh battery packs, Custom Lithium Ion 18650 battery packs, Custom Polymer Custom battery packs, Custom LiFePO4 battery packs, etc.. What to consider when designing Lithium Battery Packs ?

What is a lithium battery?

Custom Lithium Battery Packs & Assemblies Lithium is the lightest non-gaseous metal, and its negative potential for battery packs is higher than any other metal. Lithium-chemistry batteries and battery packs have the highest specific energy (energy per unit weight) and energy density (energy per unit volume) of all battery types.

What are rechargeable lithium batteries?

Rechargeable lithium batteries are popular for a wide array of applications. These battery packs provide excellent energy density, hold their charge for long periods when not in use, and do not experience "memory effect" in charging.

Why are rechargeable lithium-ion batteries so popular?

Rechargeable lithium-ion (Li-ion) rechargeable battery packs continue to grow in popularity thanks to their greater energy density--up to twice that of nickel- and lead-based chemistries--and low self-discharge rates, as well as ever-improving technologies that continue to make them safer and less expensive than earlier lithium battery types.

Explore a wide range of custom battery pack assemblies in various chemicals and styles. Contact us to get a quote tailored to your specific application!

Our battery packs are engineered for high energy density, long cycle life, and superior safety, making them ideal for electric vehicles, renewable energy storage, power tools, and more.

Custom lithium-ion battery pack designs eliminate inefficiencies through component-level optimization, maximizing energy density and extending operational life.

The advantage of Lithium-Ion is the high energy density (weight-to-size ratio). We bring together our engineering, manufacturing, and quality teams throughout the service/manufacturing ...

We specialize in custom lithium-ion battery packs, creating your own power solution, even down to the raw material ratio of the battery cells. We have 24 years of production R& D ...

What is a Niu battery pack?The NIU Battery Pack harnesses 170 cells of lithium-ion technology. This is all powered by the NIU BMS (Battery Management System) that connects each cell in parallel to ...

At BatterySpace, we provide all your needs for custom batteries. We carry a full line of different kinds of batteries, as well as top brand batteries in our US warehouse.

Whether you need a standard 18650 configuration or a fully customized lithium-ion solution, our team will create a reliable, high-performance battery pack designed to power your products safely and efficiently.
