Washington State University's new Institute for Northwest Energy Futures (INEF) will serve as a "virtual hub" for clean energy solutions -- using ...

WSU aims to find out with a new project. The university's Institute for Northwest Energy Futures has received a \$2.4 million grant from the Washington State Department of Commerce to...

Due to the configuration of a large capacity thermal storage system, it can form a highly complementary and sustainable multi energy complementary power generation mode with fluctuating power sources ...

This visualization shows wind and solar energy generation in the four Northwest states from 2000-2022. In the Northwest, wind energy generation has increased significantly more than solar energy ...

We will leverage this network to identify pressing research questions, pursue collaborative solutions, educate the next generation of energy leaders, and create opportunities for meaningful two-way ...

Washington State University's new Institute for Northwest Energy Futures (INEF) will serve as a "virtual hub" for clean energy solutions -- using researchers and professors to answer and solve...

The Council develops a plan, updated every five years, to assure the Pacific Northwest of an adequate, efficient, economical, and reliable power supply.

The dual-use demonstration site, funded by a state grant, is being designed to provide strategic orchard shading to help reduce summer sunburn risks while also generating solar power for ...
