We offer a complete range of products, including household, industrial, commercial, and site energy storage systems. Our company integrates R& D, production, and sales services, ensuring the highest ...

Nordic customers have praised Huijue Group's offerings, noting their competitiveness in design, quality, and innovation. The new liquid-cooled energy storage systems comprises ...

280Ah lithium iron phosphate batteries. The system consists of highly efficient, intelligent liquid cooling and reliable energy management solutions for various applications such as or versatile and robust ...

Imagine powering 800 Scandinavian homes through winter storms using technology that fits in shipping containers. That's not sci-fi, that's Tuesday for Huijue's R& D team.

Liquid-cooled energy storage systems are gaining popularity due to superior cooling, safety, and efficiency compared to air cooling. Ideal for industrial, renewable energy, and data ...

Here's where liquid-cooled energy storage changes the game. By circulating temperature-controlled fluids directly around battery cells, these systems maintain optimal operating conditions within $\pm 1^{\circ}\text{C}$.

European operators are now combining our cooling tech with second-life batteries, creating storage systems that outperform new air-cooled alternatives at half the capital cost.

Liquid cooling maintained cell temperature variance below 2.5°C vs. 8°C in air-cooled units. However, our hybrid model reduces liquid pump energy consumption by 60% through phase-change materials ...
