Our Solarfold(TM) containers can be fully deployed and operational in under 6 hours. The automated unfolding system allows for quick setup without needing extensive technical expertise or heavy ...

With the global push for off-grid solutions in agriculture, construction, disaster relief, and remote infrastructure, the demand for containerized solar power has never been stronger.

The off-grid version consists of a Solarfold container which, in conjunction with a suitable additional storage container, is not connected to the public power grid and functions completely autonomously.

As a flexible and mobile energy storage solution, energy storage containers have broad application prospects in grid regulation, emergency backup power, and renewable energy ...

Mobile solar containers enable total off-grid operation, providing power in locations with no utility grid or where grid access is unreliable. This is essential for rural development projects, ...

Right now, there are foldable solar container units transforming deserts into power plants and disaster zones into lit communities. These 40-foot innovation boxes combine photovoltaics, battery storage, ...

The military and defense sector represents one of the largest adopters of foldable photovoltaic panel containers due to their need for mobile, off-grid energy solutions.

These innovative modular container homes give you more options than ever before. They combine the strength of standard shipping containers with the ease of movable homes that can be set up in hours.
