What is an off-grid solar inverter?

An off-grid solar inverter is a solar inverter that works alone and cannot work with the grid. It draws energy from the battery, transforms it from DC to AC, and then outputs it as AC. In a hybrid system, the off-grid inverter can be used to create the grid.

What is an off-grid energy storage system?

You can also connect the land to utilities such as to the national electricity grid, or solar panels, local county water, sink boreholes among others. Off-grid energy storage systems are used in localities that are far away from populated areas or cities and not connected to any electricity grid.
