OnSite Energy, Inc. is a locally owned solar power contractor headquartered in Bozeman and Missoula, Montana.

We assess the feasibility of each renewable energy option (both onsite and offsite) and provide recommendations on which would best achieve your desired results.

An onsite solar array can reduce your energy costs, eliminate energy cost volatility and enhance your own sustainability efforts by providing a tangible energy asset of your own.

“OnSite Solar makes solar R& R simple. When your roof needs replacement, or upgrades, we handle everything--removing, storing, and reinstalling your system with precision.”

We deliver solar and energy storage systems for homeowners and businesses in Bozeman, Missoula, and communities across Montana. Our systems are built to last in Montana's rugged climate. With ...

Onsite solar is an asset located where the renewable energy generated will also be consumed. There are three main types of onsite solar: rooftop, ground-mount, and carport.

Explore our collection of onsite energy solar outdoor to find the perfect solution and get back to adventuring!

Explore the differences between on-site and off-site solar energy systems, their benefits, costs, and which option suits your home or business needs best.
