---

The modular design allows for easy expansion, with the option to expand the battery storage system by 100 - 500kwh, making our energy storage container perfect for meeting growing energy demands.

Customised containers with galvanised steel frames, TOPCon N cells and other components are already installed in the containers and are ready to be deployed upon arrival.

Ottawa generator containers have emerged as game-changers across multiple sectors. These modular systems combine portability with industrial-grade performance - perfect for Ottawa's mix of urban ...

Microgreen offers large-scale energy storage that is reliable in harsh environments, cost effective with top energy density, and provides best return on investment.

Examples of capacity technologies include hydrogen storage, electricity storage, natural gas, and bioenergy facilities. The deadline for proposals under this window of procurement is December 18, ...

Workers check battery storage pods at a lithium-ion battery storage energy ...

Individual containers provide 5-20kW; multiple units combine for 50-100+ kW installations. Containers share common monitoring through MOBICARE(TM) and can be configured for load sharing or ...

Workers check battery storage pods at a lithium-ion battery storage energy facility in Arizona last year. Ottawa is looking at regulatory changes around these types of facilities.
