What is a pressurized explosion proof cabinet?

Intertec's pressurized explosion proof (Ex p) cabinets are constructed from GRP (glass reinforced polyester) composite materials. These materials are highly resistant to corrosion and have a similar strength to stainless steel, but are about 75 percent lighter, making them ideal for equipment containment and personnel shelter applications.

Why are explosion proof cabinets important?

Their primary purpose is containment in case a protected device explodes within itself. Explosion proof cabinets prevent explosions or infernos from spreading to the surroundings of an internally exploding device. The net outcome is a safer work environment for personnel in industrial facilities that are prone to explosion.

What is an explosion proof enclosure?

Explosion proof enclosures are very critical to industrial facilities, utilities, chemical and oil & gas companies that use or store electrical components and devices in hazardous, explosion-prone environments.

What is a flammable vapor cabinet?

These sturdy, heavy-duty cabinets are built to minimize the risk of explosion in locations with flammable vapor, gases, and chemicals, such as oil refineries, chemical plants, fuel servicing sites, feed mills, and plastic/fireworks factories. Their primary purpose is containment in case a protected device explodes within itself.

NEMA 4X - Indoor or outdoor use to provide a degree of protection against corrosion, windblown dust and rain, splashing water, hose-directed water, and external ice formation.

These cabinets with explosion relief wall panels release when air pressures reach 20 psf inside the chamber to prevent a damaging explosion. They have air vents, spill containment sumps, generous ...

Designed for safe storage of flammable and combustible liquids in laboratories, workshops, and industrial environments requiring explosion-proof protection.

For facility managers, EPC contractors, and infrastructure operators, an outdoor electrical cabinet is a mission-critical asset that protects power distribution, control systems, and ...
