Solar Glass is a high performance low iron glass with very high solar energy transmittance. When toughened, its strength and durability make it the ideal choice for crystalline silicon photovoltaic ...

Designed specifically for photovoltaic applications, this glass serves as a protective backsheet while allowing secure fastening of solar modules. Its balanced strength-to-weight ratio makes it suitable for ...

The modules with thin glass - 2mm front and 2 mm back sheet glass - allow, in fact, higher yields compared to conventional glass for photovoltaic and are always maintaining the same performance ...

Fully tempered 2 MM solar glass is 2 times stronger than heat-strengthened glass. The glass is safer and stronger than heat-strengthened glass (that leads to larger and sharper pieces when broken), ...

Low Iron Extra 2mm Clear Solar Glass is an ultra-transparent subway glass with a light transmittance of over 91%. It has crystal clear and elegant characteristics.

Customized ITO / FTO conductive glass plays a crucial role in scientific experiments, offering excellent conductivity, transparency, and stability. Ideal for photovoltaics, sensors, and analytical instruments.

Dalian Futimes Glass Co., Ltd was established in 2010, focusing on the export and deep processing of photovoltaic coated glass and ultra-thin physical tempered ...

Our 2 mm solar glass is exclusively produced in a float glass process. This industrial process adheres to very strict production tolerances and guarantees a very low defect density.
