Why do Filipino electrical engineers need a lightning protection system?

Filipino electrical engineers must ensure that any LPS installed adheres to both the structural safety mandates of PEC and the technical rigor of international lightning protection standards. Introduction Lightning strikes pose a significant risk to structures, sensitive electronic systems, and life.

Why is lightning protection important in the Philippines?

Lightning strikes pose a significant risk to structures, sensitive electronic systems, and life. In the Philippines, where thunderstorms are frequent, the need for reliable lightning protection systems (LPS) is essential.

What is protection against lightning?

However, Protection Against Lightning is covered under Article 2.90 of The Philippine Electrical Code Part 1 - 2009. Its purpose is mentioned in Section 2.90.1.2 which states that the purpose of this article is the practical safeguarding of persons and property from hazards arising from exposure to lightning.

Who can install a lightning protection system?

Only licensed professionals such as Professional Electrical Engineers (PEE) or Registered Master Electricians (RME) are permitted to design, install, or maintain lightning protection systems and their bonding connections. 4.2.

Its purpose is mentioned in Section 2.90.1.2 which states that the purpose of this article is the practical safeguarding of persons and property from hazards arising from exposure to lightning.

We have provided lighting protection, grounding and surge protection solutions throughout multiple industries in the Philippines. Our lightning protection team provides a more detailed evaluation of your ...

PEC 1 identifies the role of lightning protection primarily in terms of safety and grounding. It requires that any lightning protection system installed on a structure must be bonded to the ...

Explore Indelec's cutting-edge technology, ensuring unmatched protection against lightning. Secure your environment with excellence at Energynet.

In this article, we break down the key requirements of the industry standard YD5068-98 - Code for Design of Lightning Protection and Grounding of Mobile Communication Base Stations, and explain ...
