As the Philippines accelerates its renewable energy transition, pumped-storage hydro emerges as the missing link between intermittent generation and consistent supply.

This new generation of era-defining PSHP plants could help flip the narrative. It looks complex; it entails huge upfront investments.

These include 14 new projects and three amendments, featuring technologies such as wind, solar, hydro, geothermal, and battery energy storage systems (BESS). Of the 17 projects, 15 ...

Summary: Discover how containerized energy storage systems are revolutionizing power solutions in Cebu, Philippines. This guide explores technical standards, industry applications, and why EK ...

Philippines: Aboitiz Power advances deployment of giant power banks co-located with hydropower plants
Large-scale battery energy storage systems underscore drive towards energy ...

Caliraya-Botocan-Kalayaan (CBK): Established in 1983, also known as the Kalayaan Pumped Storage Power Plant (KPSPP), is the first of its kind in Southeast Asia and remains the only ...

The latest model can now accommodate a higher energy density, with a remarkable capacity of 5 megawatt-hour (MWh), all packed within a compact container, distinguishing itself from ...

Transmission Electricity generated by power generation facilities is generally transported via a high-voltage transmission system to various distribution utilities or electricity co-operatives. ...
