California was particularly hard hit due to new net metering rules under NEM 3.0 that radically reduced system economics. These adverse state policy impacts exacerbated financing ...

Solar panel maker Meyer Burger shut down a U.S. factory in Arizona due to financial troubles, cutting all 282 employees, the Swiss company said on Thursday.

Multiple European solar manufacturers have announced plans to close factories in recent months, citing pressure from a flood of imports and an oversupply of solar panel parts that have piled up in ...

A major solar manufacturer has shut down its U.S. facility before production fully took off -- a move that has sparked backlash and renewed concern over the country's ability to support clean ...

After an investor terminated a restructuring and recapitalization deal at the beginning of May 2025, manufacturing challenges and macroeconomic headwinds forced the debtor to lay off all ...

According to our internal data, more than 100 solar companies have shut their doors this year alone--a level of contraction we haven't seen in nearly two decades.

Dozens of companies have shut down or filed for bankruptcy, leaving customers in limbo and with incomplete solar installations. Well-known names like Pink Energy, Solcius, Sungevity, ...

Global photovoltaic bracket prices plummeted 32% since Q3 2024, shaking solar industry foundations. Despite record-breaking solar installations (609GW deployed in 2023 alone), bracket ...
