Despite the incentives, around 53 GW of solar projects were ...

With growing investment and favorable growth projections, the future appears bright for the solar energy sector. However, underlying that positive outlook is the undeniable recognition that ...

Employment of PV installers is projected to grow 50.5 percent from 2019 to 2029, much faster than the 3.7-percent growth that is projected for all occupations. Windtechs are also expected ...

Discover the challenges of rising demand, workforce gaps, and increased costs, plus strategies like apprenticeships, inclusive recruitment, and government-supported programs driving a skilled, ...

Wind and solar jobs have been growing dramatically for at least 15 years, according to the U.S. Department of Energy. In fact, there are currently more than two and a half times as many jobs ...

As the adoption rate of solar panels soars, the need for technicians equipped with this knowledge grows, resulting in a demand-supply mismatch. Furthermore, the rapid evolution of solar...

Installers are no longer just handling basic solar panels; they're working with increasingly sophisticated systems that integrate batteries, inverters, and even smart-home energy management ...

According to the Bureau of Labor Statistics, there will be only a 22% growth in solar photovoltaic installers between now and 2032, a far cry from the number of workers we need.
