-----

Perfect for photovoltaic panels, cable trays, junction boxes, and equipment wiring. Crafted from copper, this 12AWG grounding wire ensures excellent conductivity and corrosion resistance.

Support the secure battery connection of electric bicycles, motorcycles, and tricycles with this and convenient grounding wire. It allows for parallel or series usage, providing flexibility for different ...

Best practice requires connecting the main bonding jumper (MBJ) and grounding electrode conductor (GEC) at a common location using a grounding busbar within the main disconnect or distribution ...

Grace Solar's GS-G-BJ-A Bonding Jumper ensures optimal electrical continuity in solar grounding systems. Featuring braided copper wire and stainless steel components, it minimizes resistance and ...

The Copper Solar Grounding Bonding Jumper is used to create an electrical connection between two pieces of anodized aluminum, galvanized steel, or any electrically conductive metal which has been ...

Solar grounding bonding jumper (SPC-BJ-01) is used to establish electrical connections between two stainless steel conductive sheets. The bonding jumper is composed of tinned braided copper wire, ...

The jumpers simply clip onto the frames of the solar panel, using the frame itself as the primary grounding conductor. They're manufactured from high-quality stainless-steel clips with pure copper ...

NEC-compliant stainless steel solar bonding jumpers & grounding lugs for PV modules. Corrosion-resistant, tool-free installation. Ensures safe solar array grounding.
