Through the construction of a smart energy platform, the park has realized the digital and intelligent management of photovoltaic, energy storage, charging piles and other energy sources.

The first phase of a 500-megawatt photovoltaic (PV) power generation project developed by Huangpu enterprise Hengyun in Haiyan town, Taishan, Guangdong, came into operation on Dec 28.

These green energy sources are integrated with the "photovoltaic-storage-direct flex" system to provide ample electricity for the News Center, making it one of China's most ...

The project plays a vital role in supporting Qinghai's renewable energy integration and energy structure optimization, contributing to the development of a clean, low-carbon, safe, and ...

Cailian, December 28 (Xinhua) suihengyun a announced that the first phase of 200mwp fishery photovoltaic power generation project in Haiyan Town, Taishan, Guangdong was put into operation.

The project is located in the northeast of Haiyan Wharf, Haiyan County, Jiaying City, Zhejiang Province. It mainly uses the beach inside the Haiyan Wharf to install photovoltaic modules, with an installed ...

"China's largest" integrated offshore photovoltaic (PV) demonstration project, combining solar power, hydrogen production and refueling, and energy storage, has been connected to the grid ...

As of April 12, the distributed photovoltaic power projects at buildings on Dongyu Island and the agricultural-photovoltaic complementary power plant developed by CHN Energy Hainan ...
