Cetelnet is proud to be at the forefront of renewable energy in Port Vila, delivering solar and hybrid systems that meet the city's energy challenges with efficiency and innovation.

Imagine a day when Madagascar exports wind-stored energy to mainland Africa via undersea cables. With floating wind farms and blockchain-powered energy trading on the horizon, ...

As Pacific nations accelerate their transition to clean energy, the Port Vila Energy Storage Power Station emerges as a landmark project for Vanuatu.

“Following a successful feasibility study, we are delighted to be partnering with Forth Ports, Logan Energy and PlusZero to deliver a combined state-of-the-art demonstrator system at the Port of Leith ...

.A 3.75MW Grid Connected Wind System installed in Port Vila (Unelco Initiative, USD 9 million). New Project in 2015. Project Status: Ongoing Project Level: National Type of Funding: Government Start ...

To supplement limitations in port grid capacity, and to reduce GHG and noise pollution, ports are introducing renewables (PV, wind, investment in H2-based fuels).

The use of energy storage with high power and energy densities and fast response time at ports with high power demand equipment such as different types of cranes (STS, RTG, RMG) and ...

As a promising offshore multi-energy complementary system, wave-wind-solar-compressed air energy storage (WW-S-CAES) can not only solve the shortcomings of traditional offshore wind power, but a?]
