The critical question addressed here is whether Portugal's Li reserves are sufficient to meet the Li demand for its electric mobility transition and to determine Portugal's potential role in the ...

Drawing on civil society publications, policy papers and reports, media coverage, field observations, and interviews with social movement representatives, we interrogate the emergence of ...

In the section that offers this analysis, we draw on five key expert interviews with representatives of social movements that provide novel insight into emergent societal understanding ...

The EU Battery Alliance aims to reduce European reliance on Chinese battery materials from the current 90% to less than 50% by 2030. Portugal's lithium resources provide a critical ...

To many locals, lithium mining threatens not only ecosystems but the cultural fabric of regions that depend on rural livelihoods. Environmental organisations amplify these concerns, ...

March 13, 2025: Lithium developer Savannah Resources has restarted field work and drilling at its Barroso Lithium Project in Portugal after a precautionary injunction filed by landowners was overturned.

Portugal's lithium reserves, estimated at 60,000 tonnes, are the largest in Europe [1]. Historically, the country's output has been limited to lower-grade lithium for ceramics, but recent ...

The Energy Storage Europe Association Guidelines on Safety Best Practices for Battery Energy Storage Systems (BESS) are designed to support the safe deployment of outdoor, utility-scale lithium-ion (Li ...
