How many energy storage projects will Portugal support in 2025?

Portugal's Ministry of Energy has allocated EUR100 million to support 43 energy storage projects, scheduled for completion by the end of 2025. These projects were selected from 79 applications under the country's Recovery and Resilience Plan (RRP), with eligible projects able to receive up to EUR30 million in funding.

How much money will Portugal spend on energy storage projects?

This included six projects from Spain's Iberdrola, which secured nearly EUR 20 million in public funding. Portugal's Ministry of Energy has announced that it has allocated EUR 100 million (\$104.2 million) to 43 energy storage projects which should be installed by the end of 2025.

Why is energy storage important in Portugal?

The application of the energy storage system is of great significance to ensuring the safety and stability of the power system. Portugal's Ministry of Energy has reportedly allocated EUR99.75 million to support 500MW of energy storage projects. Portugal's renewable energy is developing rapidly.

How many hybrid storage projects are being deployed in Portugal?

Additional hybrid capacity is being deployed, namely by Iberdrola, Greenvolt, Akuo, EDP and GALP, supported by Portugal's Recovery and Resilience Plan (PRR) programme under the "Flexibility and Storage" incentive call. Under this PRR scheme, 41 projects were approved, totalling around 500 MW of new storage capacity and EUR 99.75 million in grants.

Storage can replace thermal generation in constraint markets, easing the grid and supporting Portugal's 2040 phase-out target. Storage facilities can effectively deliver essential voltage and frequency ...

These projects were selected from 79 applications under the country's Recovery and Resilience Plan (RRP), with eligible projects able to receive up to EUR30 million in funding.

Eligible projects were in line for up to EUR 30 million and allowed to be developed both at the transmission and distribution levels. The tender was launched in August 2024 and preliminary ...

The batteries will allow Galp to store the solar energy produced in periods of high generation, and to deploy it during periods of high demand, maximizing the energy's value.

The country's Ministry of Environment and Energy has launched a competition for EUR99.75 million

Portugal distributed energy storage project

(US\$107 million) for grid-scale energy storage projects at the transmission and distributed-scale.

Under this PRR scheme, 41 projects were approved, totalling around 500 MW of new storage capacity and EUR 99.75 million in grants. The main beneficiaries include Akuo (80 MW), Iberdrola (80 MW), ...

Battery storage is now essential to ensure flexibility and resilience to electrical systems, supporting the growing incorporation of renewable energies. More than a technical statement, it is a ...

Hyperion Renewables, in partnership with Omexom Portugal and advanced battery manufacturer Saft, has begun construction of Portugal's first utility-scale battery energy storage ...
