Portugal has already shown how powerful its renewable sector can be. In July 2025, around 80% of the country's electricity needs were met by renewable sources, an achievement that ...

A major blackout in April 2025, which affected both Portugal and Spain, was attributed to an obsolete grid struggling to manage the new energy dynamics. This highlights the urgent need for ...

Portugal's national grid operator, Redes Energeticas Nacionais (REN), reported that renewable energy sources provided 70% of the country's electricity needs from January to ...

Every time wind speed doubles (from 2 m/s to 4 m/s), generation increases eightfold, creating major variability in power output. For these reasons, energy storage has moved from being ...

The Portuguese government plans to invest up to 400 million euros (\$466 million) to improve grid management and boost battery storage following a massive blackout across Spain and ...

Jan 16, 2025 &#183; With more than 12 GW of projected solar capacity, advancements in energy storage, and regulatory stability, Portugal is becoming a major renewable energy leader,

Under this PRR scheme, 41 projects were approved, totalling around 500 MW of new storage capacity and EUR 99.75 million in grants. The main beneficiaries include Akuo (80 MW), Iberdrola (80 MW), ...

In 2025, Portugal's renewable energy sector experienced robust growth, driven by solar expansion and supportive policies. Renewable sources met 68%...
