How to optimize solar generation in Luanda Angola?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Luanda, Angola as follows: In Summer, set the angle of your panels to 7°; facing South. In Autumn, tilt panels to 15°; facing North for maximum generation.

How much energy do solar panels produce in Luanda Angola?

Average 5.69kWh/day in Autumn. Average 4.82kWh/day in Winter. Average 5.13kWh/day in Spring. To maximize your solar PV system's energy output in Luanda, Angola (Lat/Long -8.8146556, 13.2301756) throughout the year, you should tilt your panels at an angle of 8°; North for fixed panel installations.

How to maximize energy production from a fixed-panel installation in Luanda?

To optimize energy production from a fixed-panel installation in Luanda, it is recommended to tilt panels at an angle of 8 degrees North. To mitigate potential issues related to cloud cover or dust storms, regular maintenance and cleaning of solar panels can help ensure greater energy production efficiency throughout the year.

What angle should solar panels be positioned in Luanda?

During Winter, adjust your solar panels to a 25°; angle towards the North for optimal energy production. Lastly, in Spring, position your panels at a 2°; angle facing North to capture the most solar energy in Luanda, Angola. Our recommendations take into account more than just latitude and Earth's position in its elliptical orbit around the Sun.
