Performance requirements: In the past five years (from January 1, 2020 to bid submission deadline), the bidder shall have at least one performance that includes the supply of high and low voltage electrical ...

Checklist provides federal agencies with a standard set of tasks, questions, and reference points to assist in the early stages of battery energy storage systems (BESS) project development.

SCOPE - The scope includes refinement of final design for manufacturing, procurement of commercially available components, fabrication, assembly, inspections, testing, storage (as needed) and delivery ...

UT-Battelle, LLC (the Company) is seeking an Expression of Interest (EOI) for procurement of two (2) assembled Ion Source High Voltage Cabinets, with a option for an additional twenty (20) cabinets.

All procurement must be thoroughly reviewed by agency contracting and legal staff and should be modified to address each agency's unique acquisition process, agency-specific authorities, and ...

The Ion Source High Voltage cabinet RFP is expected to be issued in June of 2022, with work to begin soon after contract award. The award will be a single, competitive fixed price construction ...

Related to the point above, the complexity of controlling all the operating parameters (voltage, frequency, etc.) of all the devices (solar and battery inverters, batteries and reclosers) demands ...

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), Power Purchase ...
